

Aim:

Design a professional resume for a candidate. The webpage should contain the following sections.

Algorithm:

1. Start.
2. Create an HTML document using the `<!DOCTYPE html>` declaration.
3. Define the document language, character encoding, viewport settings, and page title.
4. Link the external CSS file `index.css` to style the webpage.
5. Create the main resume container to hold all resume information.
6. Divide the resume into left and right sections.
7. In the left section, add:
 - a. Profile image
 - b. Contact details
 - c. Technical and programming skills
 - d. Languages known
 - e. Personal interests
8. In the right section, create the introduction area containing:
 - a. Name
 - b. Career objective/title
 - c. Short professional summary
9. Add the Experience/Training section with the training period and responsibilities.
10. Add the Education section with degree, institution, duration, and relevant areas.

11. Add the Projects section containing project names, technologies used, dates, and descriptions.
12. Add Certifications and Achievements sections at the bottom of the resume.
13. Use appropriate HTML elements such as headings, paragraphs, lists, images, div, and section to organize the content.
14. Apply CSS styling through the linked stylesheet to control the layout, colors, fonts, spacing, and appearance of the resume.
15. Save the HTML and CSS files.
16. Open the HTML file in a web browser and verify the resume layout.
17. Stop.

Source Code:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width,
initial-scale=1.0">

YOUR NAME

Aspiring Front-End Developer

Motivated BCA student with a strong interest in Front-End Development and modern web technologies. Skilled in building responsive and user-friendly web interfaces and integrating APIs. Eager to learn, build real-world projects, and grow as a professional software and web developer.

EXPERIENCE / TRAINING

Self-Directed Learning & Projects

Personal Development2023 – Present

Developed practical programming and web development skills through academic and personal projects.

Integrated APIs and handled real-world data.

Designed responsive user interfaces and improved UI/UX skills.

Continuously learning new technologies and tools.

EDUCATION

Bachelor of Computer Applications (BCA)

Your College Name, Kerala University2023 – 2027

Relevant Areas: Programming, Web Development, Database Management and Software Engineering.

Focused on building strong fundamentals in computer science and applications.

PROJECTS

SpaceX Launch Information Project

HTML, CSS, JavaScript, APIs2024

Built a web application that displays SpaceX launch data.

Designed a clean and responsive interface.

Focused on API data handling and user experience.

Personal Portfolio Website

HTML, CSS2024

Designed and developed a personal portfolio.

Implemented responsive design.

Focused on clean UI and performance.

CERTIFICATIONS

Python Programming – Infosys Springboard

Web Development – freeCodeCamp

JavaScript Basics – HackerRank

ACHIEVEMENTS

Built multiple academic and personal projects.

Continuously exploring new technologies.

Actively participating in coding challenges.

Result:

The HTML and CSS code for the ATS-friendly resume was successfully created and verified. The resulting resume uses a clear and structured layout with semantic HTML elements such as `<header>`, `<main>`, and `<section>`, making the candidate's information well-organized and easier for automated resume parsers to process.
