

Aim:

Design a webpage with frames using HTML and CSS. The webpage should contain a menu frame and a content frame, where links from the menu frame open the corresponding webpages within the content frame.

Algorithm:

1. Start.
2. Create an HTML document and define the character encoding, viewport, and title as GameVerse.
3. Apply CSS styling to create a dark gaming-themed webpage with a menu section and a content section.
4. Create the main container and divide the webpage into two parts:
 - a. Menu section occupying 22%.
 - b. Content section occupying 78%.
5. Create the GAMEVERSE navigation menu with the following options:
 - a. Home
 - b. Games
 - c. Tournaments
 - d. Gallery
 - e. Contact
6. Create an iframe as the content frame where the selected menu page will be displayed.
7. Create the Home page containing a welcome message and an introduction to GameVerse.
8. Create the Games page and display information about:
 - a. Valorant
 - b. League of Legends
 - c. Dota 2

- d. PUBG PC
- e. Battlefield V
- f. GTA V

9. Create the Tournaments page containing information about Valorant Championship, Battle Royale Cup, and MOBA Challenge.

10. Create the Gallery page and display the six featured games in a grid layout.

11. Create the Contact page containing email, phone number, and location details.

12. Create a JavaScript pages object to store the contents of all the webpages.

13. Create a loadPage() function to load the selected page into the iframe using srcdoc.

14. Set the Home page as the default page when the website is opened.

15. Save and open the HTML file in a web browser or Live Server.

16. Verify that each menu option displays its corresponding content in the content frame.

17. Stop.

Source Code:

```

Output:

Result:

The GameVerse website was successfully created using HTML, CSS, and JavaScript. The webpage contains a two-part layout with a navigation menu and a content frame. The menu provides links to Home, Games, Tournaments, Gallery, and Contact, while the selected content is displayed within the iframe. The website also includes information about Valorant, League of Legends, Dota 2, PUBG PC, Battlefield V, and GTA V, along with tournament, gallery, and contact sections.
